## **DETAILED ACTION**

### ***Election/Restrictions***

Examiner confirms that applicant's representative has elected claims 1-11, 17-29 and 31 for prosecution without traverse by telephone with examiner Meeks, Timothy on December 2004.

### ***Specification***

The specification has been checked to the extent necessary to determine the presence of all possible minor errors. However, the applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

### ***Information Disclosure Statement***

The information disclosure statements (IDS) submitted on 11/10/2003, 12/15/2003, 09/20/2004 were filed after the mailing date of the application. The submission is in compliance with the provisions of 37 CFR 1.97. Accordingly, the information disclosure statement is being considered by the examiner.

### **Claim Rejections**

Art Unit: 2818

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

**Claims 1-11, 17-29, 31** are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over **claims 1-16 of co-pending application serial number 10/648616**.

Although the conflicting claims are not identical, they are not patentably distinct from each other because claims 1-16 of **co-pending application serial number 10/648616** include limitations as recited in claims 1-11, 17-29, and 31 of present

Art Unit: 2818

application, for example, independent claim 1 of **co-pending application serial number 10/648616** comprises all limitations as cited in independent claims 1, 7, and 17 of present application: a low dielectric constant film comprising reacting two or more organosiloxanes selected from the group consisting of 1,3,5,7-tetramethylcyclotetrasiloxane and octamethylcyclotetrasiloxane while applying RF power and wherein the low dielectric constant film comprises silicon-carbon bonds and a dielectric constant of 3 or less.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

When responding to the office action, Applicants' are advice to provide the examiner with the line numbers and page numbers in the application and/or references cited to assist the examiner to locate the appropriate paragraphs.

A shortened statutory period for response to this action is set to expire 3 (three) months and 0 (zero) day from the day of this letter. Failure to respond within the period for response will cause the application to become abandoned (see M.P.E.P 710.02(b)).
